Summary

I am a **data analyst professional** with hands-on experience in **Python, SQL and data visualization**. I specialize in **analyzing** and **visualizing** data and creating **dashboards** that help businesses make better decisions. I enjoy turning **complex data** into clear **insights** and finding solutions using data. I aim to apply my skills and work with a **team** to solve **real-world problems**.

Training Experience

AlmaBetter — **July 2024 - August 2025**
Data Analyst Trainee — Bangalore (Remote)

- **Hands-on experience in Python and SQL**, optimizing data analysis and workflows.
- Proficient in **Exploratory Data Analysis (EDA)**, uncovering insights for strategic planning.
- Designed **interactive dashboards** using **Power BI & Tableau**, improving data accessibility by **40%**.
- Enhanced **stakeholder confidence** with clear and **actionable data reports**.

Work Experience

Data Analyst — **october 2025 – March 2026**
Pune

DivineLane

- Analyzed structured and unstructured data using **SQL and Python**, identifying key business trends
- Performed **data cleaning and transformation** using Pandas and Excel to improve data accuracy
- Built **interactive dashboards** using Power BI / Tableau to track KPIs and performance metrics
- Worked with stakeholders to understand requirements and deliver actionable insights
- Automated recurring reports, reducing manual effort and improving efficiency
- Conducted **exploratory data analysis (EDA)** to uncover patterns in customer and campaign data

Data Analyst Intern — **May 2024 - June 2024**
Mentorness — Remote
Certificate

- Analyzed structured and unstructured data using **SQL and Python**, identifying key business trends
- Performed **data cleaning and transformation** using Pandas and Excel to improve data accuracy
- Built **interactive dashboards** using Power BI / Tableau to track KPIs and performance metrics
- Worked with stakeholders to understand requirements and deliver actionable insights
- Automated recurring reports, reducing manual effort and improving efficiency
- Conducted **exploratory data analysis (EDA)** to uncover patterns in customer and campaign data

Projects

Pizza Sales Report : Power BI — **June 2025 - July 2025**
Project

- Analyzed **12 months** of pizza sales data (Jan–Dec 2015) using Power BI to uncover trends, top performers, and customer behavior.
- Built an interactive dashboard with KPIs like **Total Revenue ₹817.86K**, **Total Orders 21,350**, and **Average Order Value ₹38.31**.
- Cleaned and transformed messy data using **Power Query**, handled missing values, corrected data types, and created **DAX measures**.
- Identified key insights: **Thai Chicken Pizza** generated highest revenue, **Classic Deluxe Pizza** was top-selling, and **Large size** was most preferred (45.89% of sales).

Data Cleaning, Data Manipulation, Power BI, Power Query, Large Dataset Handling, DAX

HR Analytics Dashboard : Power BI — **July 2024 - August 2024**
Project

- Developed an interactive HR analytics dashboard to analyze **attrition trends** among **1,470 employees**.
- Visualized data using **bar charts**, **pie charts**, and **line graphs**, incorporating **department-wise filter panels** for detailed exploration.
- Highlighted key insights, such as a **16.1% attrition rate**, average employee **age of 36 years**, and turnover trends in specific **salary slabs** and **education fields**.
- Enabled HR teams to identify and address critical factors contributing to **attrition**, improving **retention strategies**.

Data Cleaning, Data Manipulation, Power BI, Power Query, Large Dataset Handling, DAX

Road Accident Dashboard : MS Excel — **June 2024 - July 2024**
Project

- Processed **417,883 total casualties**, categorized by **vehicle type**, **road type**, and **surface conditions**.
- Utilized **innovative charts** (line graphs, donut charts, bar charts) for **visualizing fatal**, serious, and slight casualties.
- Identified trends and key metrics for **urban vs rural areas** and **light conditions**, comparing **2021 vs 2022** data.
- Enabled decision-makers to use the dashboard to **improve road safety policies** and **target high-risk areas**.

Pivot Tables, Power Query, Data Analysis, Data Visualization
